Top Skills

AI in Power Systems
Renewable Energy Systems
Power System Automation

Languages

Sinhalese (Professional Working)
English (Full Professional)
Tamil (Native or Bilingual)

Certifications

Space technology 101
Microsoft certified Introduction to AI concept
Introduction to Machine learning Concept
Gemini Certified University Student exam
Jinja2 Basics (Mini Course)

Honors-Awards

Best performance in Advance level examination 2022
Best Performance of the year (2022)

Farhan Mohammad

B.Sc. (Hons) Electrical and Electronics Engineering Student |
Engineering Enthusiast

Ampara District, Eastern Province, Sri Lanka

Summary

Hello! I am an Electrical and Electronic Engineering undergraduate passionate about developing practical engineering solutions by combining electrical engineering, electronics, programming, intelligent systems, and emerging technologies. Throughout my undergraduate journey, I have gained hands-on academic and project experience in Power Systems, Renewable Energy, Power Electronics, Control Systems, Electronics, Embedded Systems, PCB Design, Digital Systems, Instrumentation, Signal Processing, and Computer Networking.

Electrical Engineering & Simulation Experienced with MATLAB/Simulink, PSCAD V4.6, LTspice, Proteus, NI Multisim, Feedback, and NI LabVIEW for circuit simulation, mathematical modelling, power-system analysis, control systems, signal processing, and engineering experiments.

Electronics & PCB Design Familiar with Altium Designer, KiCad, and EasyEDA for schematic design, PCB layout, circuit development, and hardware prototyping.

Embedded & Digital Systems Experience with Arduino IDE, Quartus Prime, and CEDAR Logic for microcontroller programming, digital logic design, FPGA-related development, and hardware-software integration.

Programming & Engineering Computing Working knowledge of Python 3.12, C, C++, JavaScript, and ReactJS, using Microsoft Visual Studio, Code::Blocks, and Notepad++ for engineering programming, automation, data processing, and application development.

Networking & Analysis Practical exposure to Cisco Packet Tracer, Wireshark, and Nmap for network design, configuration, packet analysis, troubleshooting, and network fundamentals.

AI & Generative AI actively use modern AI tools such as ChatGPT, Gemini, Claude, Grok, Perplexity, and DeepSeek for technical research, programming assistance, engineering problem-solving, documentation, and exploring AI/ML applications in engineering.

Instrumentation & Data Acquisition Experience with NI LabVIEW and DAQami for measurement, data acquisition, monitoring, instrumentation, and experimental analysis.

My key

interests include Power Systems, Renewable Energy, Power Electronics, Embedded Systems, Control & Automation, Electronics, PCB Design, AI/ML, and Intelligent Energy Systems. My goal is to combine electrical engineering knowledge, practical hardware skills, programming, and emerging technologies to develop innovative and reliable solutions for real-world engineering challenges.

Experience

People's Bank Sri Lanka

Junior Accountant

February 2023 - February 2024 (1 year 1 month)

Education

University of Jaffna

Bachelor of Engineering (Hons) University of Jaffna – Kilinochchi premises

2023 – Present, General · (February 2024 - February 2028)

Ashraf central college(National School) Irakkamam

Primary Secondary · (January 2007 - January 2022)

UNIQUE INSTITUTE OF MANAGEMENT & TECHNOLOGY,
UNIQUE CITY, GHAZIABAD

ReactJs · (March 2025 - August 2025)

Vocational Technical College, Akkaraipattu, Srilanka

Associate's Degree, Drafting/Design Engineering Technologies/

Technicians · (January 2023 - August 2023)
